## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-24 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The most related references to the claimed inventions are Isaksson et al. (US. Pat. #: 6,466,629), Cheng et al. (US. Pat. #: 6,898,210), Geile (US. Pat. #: 7,310,522) and Vitenberg (Pub. No. US 2005/0047513). However, none of the above references as well as other prior art of record clearly teach or fairly suggest the a method comprising, inter alia, dividing a power signal of at least one component frequency of the first multi-tone signal by a power signal of at least one component frequency of the second multi-tone signal to determine a ratio value; and determining a characteristic of the local loop based upon the ratio value, as substantially described and connected to independent claim 1. Furthermore, the prior art of record fails to clearly teach or fairly suggest the similar features as substantially recited and connected to the independent claims 9 and 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
